

Island Grove Regional Park

Trees planted as far back as 1869, spacious lawns, and a range of facilities that border the Poudre River have earned Island Grove Regional Park a reputation as one of the most picturesque and versatile events complexes in the nation.

Island Grove is a multi-use events complex owned by the City of Greeley and Weld County. Located on 145 acres, there is plenty of space for all ages to play! More than 600,000 guests use or attend events annually at Island Grove Regional Park.

The Buckle Club

at Island Grove Regional Park

The Premium Meeting Location

The Greeley Stampede and the City of Greeley are partnering to build a new facility in Island Grove Regional Park. The new 5,000+ sq. ft. building will feature ADA compliant restrooms including two family restrooms, two multi-use concession stands and a 1,500 sq. ft. banquet room with a covered patio. This new facility will replace the existing outdated round restrooms located in the middle of park.

The Buckle Club banquet room, located on the upper floor, will be available to rent year round through the City of Greeley and will be ideal for meetings, private parties and family gatherings. The City of Greeley expects to have more than 30 weekend and 40 weekday reservations for usage of the building annually. Depending on the venue setup, the total occupancy will be 380 depending on the venue setup (209 for the Buckle Club and 171 for the covered patio.)

During the annual Greeley Stampede event, the Buckle Club will be an exclusive hospitality area for major event sponsors and VIPs and offer ideal viewing of the Banner Health Free Stage, food court, daily parade in the park, firework displays and the Stampede Saloon.

More than 600,000 people annually use or attend events at Island Grove Regional Park including the Greeley Stampede, Colorado Farm Show, the Greeley Blues Jam, the Greeley Kennel Club Show and the Evergreen Kennel Club Show.

The estimated cost of the project is \$965,000. The general contractor is Turn Key Builders and it is expected to be completed by June 1, 2016.
