## Feeding Directions

Feed to all classes of livestock. Feed at a rate of 1 to 3% of body weight to cattle, sheep, goats and horses. Feed free choice to growing swine or from 6-15 pounds to adult swine depending on stage of production and weight. Always feed with a free choice forage source and a free choice to ruminants and horses. Always provide free choice minerals, vitamins and clean water. Never feed wet or moldy feed.

## Caution

Always provide a source of fresh clean water, and free choice minerals. When making changes in an animal's diet, allow a 7 to 10-day transition period. Provide ample feeder space for livestock. Do not feed wet, moldy, or insect infested feed.

This is an all stock feed that was designed to provide a "one bag" option for producers. It does have a good bit of fine material and will be sorted especially by sheep and goats for the first few days. They will adjust and clean the trough after a few days. IT DOES NOT CONTAIN SUFFICIENT MINERALS FOR MOST ANIMALS AND SUPPLEMENTAL MINERALS SHOULD BE OFFERED.
