Feeding Directions

Feed to horses at the rate of .5 to 1.5 lbs. per 100 lbs. bodyweight depending on the quality and quantity of other feedstuffs available and the intended use of the horse. Do not feed free choice to any animal. Provide good quality hay or pasture.

CAUTION

Do not feed to sheep due to copper levels in this feed.

IMPORTANT MANAGEMENT PRACTICES: Always provide a fresh source of clean water, salt and free choice minerals at all times. When making any change in an animal's diet, plan a 7 to 10-day transition period. Do not allow feed to stay in feeder for a period of longer than 3 days. When feeding large amounts of this feed (over 5 pounds per day) split the feeding amount into two different feedings to reduce the incidence of colic. Poorly managed feeding programs can lead to nutritional disorders.

Manufactured by

ALABAMA FARMERS COOPERATIVE INC.

Decatur, Alabama 35601

Net Wt. 50 lbs. (22.67 kg)

This feed was designed to be fed to lactating mares and to young foals. The nutritional demands of lactating mares are high and this high protein energy dense textured feed will help you to keep your horses in good shape. To help prevent foaling difficulties, take care not to overfeed the mare in late gestation.
