

Bismarck Event Center

Notice to Exhibitors

Exceed Expectations Through Engaging Experiences

Listed below are regulations that will be enforced during exhibit shows.

1. The use of bottled gas within the building is prohibited. Containers must be removed from the vehicle before it is brought in. Propane tanks 5lbs or less may be permitted.
2. Any tanks containing compressed air or other materials (helium, CO2) must be supported by a base or tied with non-combustible ties or chained to some type of support to prevent their tipping or falling. Any tanks not in use must have a protective cap attached at all times. LP tanks shall be limited to 12 lbs. or less.
3. Nothing may be hung or taped in any manner without prior approval from BEC staff. Decorations, signs, banners, etc. may not be nailed, tacked, stapled or otherwise fastened to ceilings, walls, doors, painted surfaces or columns unless done by or under the direction of BEC staff. Masking tape or gaffers tape can be used. Check with BEC staff before hanging anything to get permission. Do not use chairs to stand on for hanging banners. A number of ladders are available for use from the BEC.
4. No staples, stick pins or tacks may be used on draping and/or tables. We do not allow any items to be hung in any manner (including the use of tape) from our draping. Show curtain hooks or clothes hangers can be used to hang items from the top cross bar only.
5. No holes may be drilled, cored or punched in the building.
6. No painting or welding is permitted in the building. If cleaning chemicals are used (tire cleaners, etc), protective measures must be taken to protect the floor surface and finish.
7. No adhesive backed (stick-on) decals or similar items (except name tags) may be distributed or used in the building. Magnetic backed decals are allowed.
8. Any vehicle displayed in a show must have the battery cables disconnected unless the vehicle has a kill switch, which must be turned off. The gas or fuel tank must either be taped or locked and may contain no more than ¼ tank of fuel or 5 gallons whichever is less.
9. Any sample food and/or beverage products that may be distributed must have prior approval by Event Center Management. Food sampling must be covered by a food permit. All vendors must comply with fire codes in the building. Use no open flames and use flame retardant materials in your booth design. For safety purposes, cooking should be done at the back table or your booth, not the front and you must bring a small fire extinguisher approved for electrical fires. Plastic throw away gloves must be worn at all times while doing food sampling.
10. Helium Balloons are permitted in the exhibit hall only as part of decoration for the event. Balloons must be weighted to prevent them from floating to the ceiling. There will be a charge of \$5.00 per balloon for any left on the ceiling. Helium balloons are **not** permitted in the arena building for any purpose.
11. The BEC requires the use of residue resistant carpet tape. All tape must be removed and residue cleaned up immediately after the show.
12. Electrical service is provided within 50 feet of booth location. Exhibitors should provide their own extension cords or multi strips.
13. The state of North Dakota requires all exhibitors to have a state tax permit and must register with the Secretary of State if they are going to be making taxable retail sales in North Dakota.
