

This Creative Living project comes to us from Jae Brown.

Jae says, "This piece was made by using a photo already taken and drawing, what I like to call, a paper rift of a cool detailed gear mechanical hand. I was inspired by the steampunk era and the graphic design used in mechanical engineering. My family wanted me to share my artwork and my mom suggested that I submit my work through the Boulder County Fair."

To see more of Jae's artwork, follow [@rose.\\_.artist04](#) on Instagram.
