A public log will be kept of the names of all offeror organizations which submitted proposals. Pursuant to NMSA 1978 § 13-1-116, the contents of any proposal shall not be disclosed to competing offerors prior to contract award.

7. Evaluation of Proposals

The evaluation of proposals will be performed by an Evaluation Committee selected by the management of Expo New Mexico. This process will take place following the due date specified in Paragraph II.6. During this time, the Procurement Manager may, at her option, initiate discussions with offerors who submit responsive or potentially responsive proposals for the purpose of clarifying aspects of the proposals, but proposals may be accepted and evaluated without such discussion. Discussions SHALL NOT be initiated by the offerors.

8. Selection of Finalists

Finalist offerors may be required to present their proposals to the Evaluation Committee. The Procurement Manager will schedule the time for each offeror presentation.

11&12. Contract Award

After review of the Evaluation Committee Report, a contract will be sent for execution to the offeror deemed by the evaluation committee as most advantageous to the Fair. The Offeror will return the signed contract to the Fair, and the signed contract will then be submitted to Fair management for consideration and possible award. Please be advised that no contract with the Fair is legal and binding until approved by and executed by the general manager.

The contract will be awarded to the responsible offeror or offerors whose proposal is most advantageous, taking into consideration the evaluation factors set forth in the RFP. The most advantageous proposal may or may not have received the most points.

In the event that mutually agreeable terms cannot be reached within the time specified, the Fair reserves the right to finalize a contract with the next most advantageous offeror without undertaking a new procurement process.

APPENDIX "F"

SYSTEM A – TINGLEY COLISEUM

Sound System

The successful Offeror shall provide a professional "Class A" concert PA system consistent with contemporary industry standards, to include at a minimum, the following:

Speaker system (e.g., Clair, EAW, Meyer, V-DOSC, JBL) with amplifiers (e.g., Crown, Crest, QSC, Lab Grupper) to cover 9,286 seat Tingley Coliseum to a sound pressure level of 100db plus or minus 3 db in all seating areas and the ability to be tied into the "house" speaker system.

Front of House (FOH) equipment:

Console (e.g., Yamaha, Soundcraft, Midas, ATI Paragon) with a minimum of 56 channels

12 channels of limiting (e.g., dbx, Brooks Siren)

8 channels of frequency keying gates

3 multi effects units (e.g., Yamaha, Lexicon, TC Electronics)

1 harmonizer (e.g., Eventide H3000)

1 effects delay (e.g., TC Electronics D-2)

1 alignment delay

Overall graphic EQ

Delay software (e.g., Smart Live) and engineer qualified to use it to test and set-up delays and integrate with "house" system.

Stage monitor equipment:

Console (e.g., Yamaha, Soundcraft, Midas, ATI Paragon) with a minimum of 56 channels and capable of 22-24 mixes for both wedges and ear monitors

16-20 bi-amped wedges with 2" horn driver (e.g., Clair, EAW, Meyer, JBL)

12 channels of EQ

8-10 channels of limiting

6-8 channels of gating

2 multi effects units for monitors

Provide all necessary microphones, stands, direct boxes, cables, power distribution, stage power, Clear-com and engineers. Contractor will be required to coordinate with other contractors and New Mexico State Fair staff in Tingley regarding issues such as the timing of load-in and load-out

Sound System shall be arranged to provide 180-degree coverage from a proscenium location above either side of the stage plus appropriate side-fills on either side of the stage and appropriate down-fill. House system will be used in conjunction with Offeror's system to provide delay coverage throughout the house. Sound pressure levels must be consistent in level and frequency response throughout the house. Offerors are advised to familiarize themselves with the geometry of the venue.

The sound system must feed into the house PA system via the input panel located in the catwalk.

As a part of the Sound System, the Offeror must be able to provide four (4) professional quality (Sennheiser, Lectrosonics, or equal) RF wireless microphones with hand-held transmitters to be used during the Rodeo. The Fair will assist in frequency coordination.

In general, the Fair does not provide back line stage equipment for Tingley Coliseum, such as electric pianos, synthesizers, guitar amplifiers, and drum kits as specified in the performance riders. This service need not be addressed in the Offeror's proposal.

The Offeror must supply a power distribution system that provides branch circuits for the entire contracted PA and lighting system. Stage power distribution is also to be provided by the Offeror. All distribution panels and outlet boxes shall conform to the National Electric Code, Articles 520-530, state laws, regulations and directives from state agencies or officials, including the state fire marshal. In addition, all services required by this RFP shall conform to applicable state and national codes, state laws, regulations, and directives from state agencies or officials, including the state fire marshal. All single conductor feeder cable and multi-conductor branch cables shall conform to the National Electrical Code, Article 400. Single conductor welding cable will not be allowed.

All labor necessary for the installation, operation, adjustment, and removal of the above equipment shall be provided by the Offeror. Offeror is required to use the Fair's stage contractor (Note: the Fair will provide stage crew for performances.) If re-rigging is required by the Fair during the Annual Event, the Fair will pay direct rigging costs to the Fair's contracted riggers. Contractor will be required to provide supervision and direction of riggers at no additional cost to the Fair.

Lighting System

The successful Offeror shall provide all necessary stage lighting equipment to deliver a well lit, professional show for the patrons of Tingley Coliseum, including instruments, spare parts, support devices, cabling, controllers, and color medium, to accommodate all bands and rock shows.

Lighting System should have par cans and very narrow lamps. The Fair encourages the use of intelligent computer controlled lighting fixtures such as High End, Vari-Lite, and/or Martin products. The essence of the requirement is a professionally lit performing stage meeting current concert standards. Each of the trusses will be independently flown. The trusses should be back from the sound system to prevent blockage of sound and should be adjusted to allow the spotlights to work the entire arena floor. The system should have patch capabilities and a programmable dimmer board. A decentralized dimmer system will work best to help reduce cable runs on the catwalk. The decentralized dimmer system is not a requirement. Some small lighting must be provided to light flags on the south end of the arena. The rodeo

announcer and musical director will need lighting, which could be either a small system, or part of the large system. The lighting units must be hung from the cat walk in such a manner that will not shine light in the announcer's eyes. **Due to the temporary nature of the flying stage, arena lighting beneath the flying stage must be addressed by Offeror, keeping in mind that arena lighting must be consistent (color, temperature, and light level) over the entire arena floor.** Offerors are advised to familiarize themselves with the geometry of the venue.

Each truss should have a minimum of two motors to support the truss. Each truss should have a minimum of four-color washes plus applicable specials.

Offeror must supply color medium for all stage lights and six spotlights. All color must be new at the beginning of the Fair and sufficient amounts of medium must be available to replace worn gel at the lighting director's direction. Color correction for video is required on all six spotlights
