The state unit includes all chapters of the state, under the supervision of the State Dept. of Education as represented by the Bureau of Agricultural Education, with its headquarters at the State Education Bldg., Sacramento.

The national unit is the group of associations in each state, and Puerto Rico, under the supervision of the Agricultural Education Div. of the U.S. Office of Health, Education and Welfare, Washington, D.C. #### Swine Entries from Other States

1. All exhibition swine entering California require official individual identification (ID), an Interstate Certificate of Veterinary Inspection (ICVI) obtained within thirty (30) days before movement into the state and listing official ID and a California entry permit prior to entry.
2. Acceptable forms of Official Identification include:
  - a. Official Ear tags - A tamper-resistant metal or plastic official identification tag with high retention rate that provides unique identification for individual animals. It must bear the US shield and conform to one of the following numbering systems: National Uniform Ear-tagging System (NUES), Animal Identification Number (AIN) or Premises Identification Number (PIN).
  - b. Ear notches or tattoos (ear or inner flank) if recorded in Purebred Registry Association Board with documentation attached to the ICVI
3. It is unlawful to remove official identification
4. No brucellosis or pseudorabies tests are currently required.

***Exhibitors MUST upload photos and all required documents before submitting entries on line. All documents will be sent electronically.***

**ALL BFF EAR TAGS MUST REMAIN IN THE ANIMAL'S EAR. HARVEST FACILITIES WILL NOT ACCEPT ANIMALS WITHOUT EAR TAGS**

**MANDATORY EAR NOTCHES  
FOR PIGS TO BE ELIGIBLE TO SHOW IN MARKET  
CLASSES ALL HOGS MUST HAVE EAR NOTCHES  
FROM THE BREEDERS.**

### UNIVERSAL EAR NOTCHING SYSTEM

The standard ear notch system will consist of a standard set of numbers and notches located in specific areas.

### Standard notches in the pig's RIGHT EAR are as follows:

The # 1 notch located on the bottom of the right, ear near the pig's head  
The # 3 notch located on the bottom side of the right ear close to the tip  
The # 9 located on the outer half of the top of the right ear  
The # 27 notch is located closest to the head on of the right ear  
The largest notch # 81 is located at the tip of the right ear.  
Any combination of the standard notches can occur with no more than two notches of any one number. For example; 3 + 3 = 6 and you will NEVER see 3 + 3 + 3 = 9. This does not exist and neither does 81 + 81. There is only one tip on an ear, so there can only be one 81 notch. The right ear can only have a maximum of 161 (81 + 27 + 27 + 9 + 9 + 3 + 3 + 1 + 1 = 161).

### Standard notches in the pig's LEFT EAR are as follows:

The # 1 notch located on the bottom of the left ear near the pig's head  
The # 3 notch located on the bottom side of the left ear close to the tip  
The # 9 notch is located on the outer half of the top of the left ear

### MEAT STANDARDS

Four factors, in the order of their importance, for judging meat pens, are as follows (1) Meat type, (2) Condition, (3) Uniformity, and (4) Fur Meat pens shall consist of the three rabbits, all of the same breed and variety. Broken group meat pens must also be of the same variety. A meat pen does not necessarily have to come from the same litter. Age limit 10 weeks. Minimum weight 3 ½ pounds each. Maximum weight 5 ½ pounds each. All rabbits must be weighed in by Fair staff, or in the presence of the judge.

### POINT SCHEDULE FOR JUDGING MEAT PENS

Meat type	40 Points
Condition of Flesh	30 Points
Uniformity of body and weight	20 Points
Fur	10 Points
TOTAL	100 Points

### MEAT TYPE 40 points

The most desirable animals are those with commercial type. The body should be heavily muscled and well rounded. The back legs should be thickly muscled and extend far down the leg toward the hock joint. The loin should be wide and thick starting from the rib cage and continuing to the hip loin juncture. The rib cage should be deep, well sprung, and have a wide chest floor to properly house the heart and lungs, all of which are vital in the animals growth. The front legs should also be considered in the evaluation of the animal and should carry enough muscle to balance and correctly support the animal loin/midsection are second of importance. The hind quarters are most important, and forequarters are third in importance.

**FAULTS:** Fault for large frame, heavy bone, large head, thick ears, heavy hide. Fault animals that are thinly muscled, tapered in the loin, narrow chested, and exhibit protruding hips.

### CONDITION 30 Points

All fryers in a pen must be in prime condition. This reflects the care and management practices of the breeder. The fryers must be firm and solid. They must not show any signs of flabbiness, softness, looseness, or pottiness. The pelt must be tight over the body and the animals must be clean and show no signs of neglect or disease.

### UNIFORMITY 20 Points

Uniformity reflects the ability of the exhibitor to select three fryers for the pen that have similar traits. Uniformity must be present in weight, size, appearance, condition, meat type, and fur, and should be as similar in all respects as possible. (All six elements of uniformity are to be valued evenly.)

**FAULT:** Lack of uniformity.

### FUR 10 Points

Fur should conform to the breed description in the standard and be uniform on all three animals in the pen.

### DISQUALIFICATION FROM COMPETITION

All ARBA disqualifications from competition and breed disqualification from competition apply to each meat pen, with the following exception: Body smut on pointed white marked animals. Bucks must show both or either testicle. Those showing only one at time of judging, are to be disqualified from competition.

**FAULTS:** Stained or Dirty animals

**NOTE:** On Californian meat pens and single fryers, the frosting due to genetic characteristic or nest box chilling shall not be a disqualification. Such animals are to compete as if their pelts were white, as called or underweight, the entire pen is disqualified from competition. If anyone rabbit in the pen is disqualified from competition, the entire pen becomes disqualified. All ARBA general faults apply to each meat pen. All rabbits must be the appropriate weight and size. Rabbit meat pens shall be of the same breed and variety.
