

Tortillas: From the Farm to Your Plate

Farmer selects wheat seeds to produce the best product.

Seed is planted in the spring (April or May).

Wheat matures in the field.

Wheat is harvested from fields in late summer (August or September).

From flour, tortillas can be made and packaged for sale.

Flour is one of the many products produced from wheat.

Wheat is transported to processing plant.

Tortillas arrive at the grocery store.

Consumer purchases tortillas and use them as part of many different meals.
