ENTOMOLOGY

Sara Eccles, Chair eccles@embarqmail.com (913) 856-7350

1. Conference judging available.
2. General Regulations
 - a. Enrollment requirements for 4-H'ers: Entomology. Must be enrolled by May 1.
 - b. A 4-H member may choose to exhibit in the Collection and/or Educational class for the phase in which they are enrolled.
 - c. All entries are to be placed in Plexiglas covered wooden boxes with outside measurements of 18"x24"x3-1/2". See the specific phase for box and specimen number limitations.
 - d. Emphasis in judging will be placed on the overall variety of Kansas insects represented in the collection, accuracy of identification, skill and technique acquired in mounting of specimens and overall arrangement and appearance of the collection.
 - e. 4-Hers may choose one of two taxonomies:
 - i. As printed in Insects in Kansas book or
 - ii. As printed on the "Insects in Kansas Book: 2016 Revised Taxonomy" handout, which follows www.bugguide.net.
 - f. Each exhibitor is required to identify each box with two identification labels bearing exhibitor's name, county or district, the collection class in which the 4-Her is enrolled and statement of taxonomy used. One label goes in the upper left corner of the box (inside) and the other on the lower right corner of the box (outside). Arrange specimens in the box so the box can be displayed lengthwise.

- g. The number of orders, specimens (and families where required) must be included on both of the exhibitor's box identification labels. Only adult specimens can be used in collection boxes; however one female and one male of a species correctly identified can be displayed.
 - h. Members may continue to exhibit in the advanced entomology classes for an unrestricted number of years as long as they remain eligible for 4-H membership
3. Collection Classes
- a. For each collection class, two labels will be centered on the pin beneath each specimen. First (closest to the specimen) is the common name label and the second label should include date/locality. Full county name and state abbreviation on the second label. Collector's name on the date/locality label is optional.
 - b. The specimens should be collected by the exhibitor and should focus on Kansas insects. Insects may be collected from one county into bordering states and labeled accordingly. Other specimens from the United States may be included as long as they are properly labeled and placed in a separate section of the box labeled "Out of State Insects". These specimens will not be included in the count for judging/scoring.
 - c. Only specimens of the class Insecta should be included.
 - d. Arrangement of specimens: The preferred method is to arrange the insects in groups or rows parallel to the short sides of the box. Specimens are to be arranged by Order in the box, then Family where required. The sequence arrangement of the Orders in the box will be left up to the member.
 - e. Purchased insects are not to be exhibited in collections, but they may be used in educational displays.
 - f. Specimens of soft bodied insects such as aphids, lice, termites, etc. should be exhibited in alcohol filled vials; however, the use of alcohol filled vials should be limited to only those specimens that lose their shape when pinned, since the vials pose a significant hazard to the rest of the collection if they become loose in transit.
4. Educational Classes
- a. Share what you learned in this project. The purpose of the project is to learn more about the importance, life cycles, biology, ecology, diversity, etc. of insects and related arthropods. Subject matter can be as varied as the animals themselves. Creativity is encouraged!
 - b. Displays may consist of specialized groups of insects or their close relatives, or relate to any aspect of their behavior, biology or ecology.
 - c. The exhibit may be, but is not limited to, original works, digital presentations (must provide printed hardcopy for exhibit purposes for duration of the fair), programs, websites, games, apps, display box, notebook, display or poster which you have made.
 - d. If the exhibit is a wooden display box, it must be 18"x 24" x 3.5" with a clear plastic top (such as Plexiglas). Boxes can be handmade or purchased as long as they are of the correct size. Arrange display in the box so the box can be displayed lengthwise. If the exhibit is a poster, it must not be larger than 22" x 28". If the exhibit is a display, maximum size is not to exceed standard commercial 3' x 4' tri-fold display board.
 - e. Title of the exhibit should be indicated inside the box.

- f. Displays should be presented in a clear, concise, and interesting manner.
 - g. Displays should include only work performed during the current year.
 - h. Each exhibitor is required to identify each box by placing two identifications labels bearing exhibitor's name, county, or district and the class in the box. One label goes in the upper left corner of the box (inside) and the other on the lower right corner of the box (outside). Information on number and kinds of insects is not needed for the educational exhibits.

GEOLOGY

Natasha Graham, Chair, 913-653-9125 nlgraham95@gmail.com Michelle Graham Co-Chair mandrisa@gmail.com (913) 768-7238

1. Enrollment in Geology required.
2. The exhibit box should be 18"x24"x3-1/2". Plexiglas covers are required. All specimens are to be arranged across the narrow (18") dimension of the exhibit box, making the exhibit 18" across the top and 24" deep exactly. If the box has a sliding Plexiglas cover, it must be removable from the top. Screws, locks or other devices that would prevent judges from removing the cover should not be used. For lapidary classes only, the dimensions of the box should be appropriate for the display, but should not exceed 18" x 24" x 3 1/2".
3. Each exhibitor is required to identify each display box by placing an identification label bearing name, county or district, and number of specimens in the upper left-hand corner of the Plexiglas cover (inside-use clear double-sided tape to adhere labels), and by attaching a label with the same information to the lower right corner of the box on the outside. Attach an entry card to the outside of the box.
4. Exhibitor may enter in all areas: geology, lapidary, mineralogy, and educational exhibit. However, an exhibitor may enter only one of the geology classes and only one of the lapidary classes.
5. Specimens should be labeled with the number of specimen, date collected, specimen name or description, and county where collected.
6. For the Geology and Mineralogy classes, all specimens must be collected by the 4-Her, not purchased, from locations in Kansas **with the exception of the Tri-State Mining Area specimens collected from Ottawa County, OK; Newton and Jasper Counties, MO.** No other out-of-state specimens will be counted for the minimum number of required specimens or be considered for judging.

7. After the exhibitor has exhibited at the State Fair in one level, he or she should progress to the next level. After he or she has reached the 60 specimen class, they will continue to exhibit there.
8. Class Descriptions

Geology – For all geology classes, there must be at least 5 each of rocks, minerals, and fossils. Identify the rocks as igneous, sedimentary, or metamorphic. List the Phylum, Class, and Genus of the fossils. The Genus and Species (when applicable) should be italicized or underlined, but not both. The Genus name is to begin with a capital letter, and the species name (when applicable) is to be all lower case. The words “phylum, class, genus” must be spelled out on the label. More than one specimen of the same rock, mineral, or fossil may be exhibited if the duplication represents different geological formations. The specimen label must show this distinction (Fort Hays from the Morrill Limestone Member, not just Phylum: Brachiopoda Class: Articulata Genus: *Composita*). It is recommended that 4-Hers continue to exhibit in the 15 specimen geology class until they are of State Fair exhibit age and qualify for the State Fair. This is recommended so that when they start exhibiting at the State Fair, they are able to start with the 15 specimen exhibit as opposed to a higher number of specimens. After the exhibitor has exhibited at the State Fair in one level, he or she should progress to the next level. After he or she has reached the 60 specimen class, they will continue to exhibit there. Specific class rules are below.

 - *15 Specimens – Display a minimum of 15 specimens collected during the current 4-H year. The exhibitor is limited to one exhibit box.
 - *30 Specimens – Display a minimum of 30 specimens, of which at least 15 were collected during the current 4-H year. The exhibitor is limited to one exhibit box.
 - *45 Specimens – Display a minimum of 45 specimens, of which at least 15 were collected during the current 4-H year. The exhibitor is limited to two exhibit boxes.
 - *60 Specimens – Display a minimum of 60 specimens, of which at least 15 were collected during the current 4-H year. The exhibitor is limited to two exhibit boxes.

Educational Exhibit – An exhibit relating to everyday living, to a mineral test, a rock formation, geological history, species of a fossil, forms of one mineral, a variation of one kind of archaeological artifacts, or Indian artifacts. Digital formats are accepted. The exhibitor must make arrangements for the judge to view the exhibit and have a hard copy for display. Exhibit is limited to 4 feet of table space. Care should be taken to withstand fair conditions.

Mineralogy – Display a minimum of 15 mineral specimens collected in Kansas, at least 5 of which have been collected during the current 4-H year. The minerals are to be grouped by mineral class (i.e.: Carbonates Oxides, Silicates) and at least 3 classes must be represented. The member must use one standard display box. The specimens must be labeled with the number of the specimen, date collected, name of specimen, county where collected and chemical composition (i.e. CaCO₃ for calcite) if known.

Lapidary – All lapidary specimens should be labeled with the following: Specimen name; Place of origin (country, state, or county; county required for Kansas specimens); Purchased or self-collected; Date lapidary treatment began; Date lapidary treatment completed (Treatment completed after the State Fair is considered a new year specimen). A 4-Her should continue to exhibit in the 5 polished and 5 Unpolished class until they are of State Fair age and have qualified to exhibit there. Then the 4-Her must move on to another class.

*5 Polished and 5 Unpolished – Display at least 5 varieties of polished (tumbled) specimens and 5 varieties of unpolished specimens that have not yet received lapidary treatment. These do not have to be an example of “before and after”, nor do they have to be self-collected. Locales must be identified.

*Before and After of 3 Varieties of Specimens – Display before-and-after examples of at least 3 varieties of specimens, at least 2 tumble-polished and 2 unpolished of each. There is no requirement that the 4-Her collect any of these. Locales must be identified. Lapidary work should be done during the current 4-H year.

*Before and After of 6 Varieties of Specimens- Display before-and-after examples of at least 6 varieties of specimens, at least 2 tumble-polished and 2 unpolished of each. At least two varieties should be collected from the native site by the 4-Her, at least one of which comes from Kansas. Locales must be identified. Lapidary work on at least three varieties should be done during the current 4-H year.

*Before and After of 9 Varieties of Specimens – Display before-and-after examples of at least 9 varieties of specimens, at least 2 tumble-polished and 2 unpolished of each. At least three varieties should be collected from the native site by the 4-Her, at least two of which come from Kansas. Locales must be identified. Lapidary work on at least three varieties should be done during the current 4-H year.

*6 Specimens, 3 Mounted – Exhibit at least 6 specimens that have not been previously exhibited, which have received lapidary treatment. Lapidary treatment may consist of polishing, and end, face, or flat lapping. Specimens must represent at least 3 different varieties and include at least three cabochons of any size or shape, only one of which must be free-formed. A cabochon is a style of cutting in which the top of the stone forms a domed or curved convex surface. Three of the specimens must be mounted into jewelry findings.

The lapidary will be judged on the following criteria:

Workmanship and Content.....60 points
 Presentation and Showmanship.....30 points
 Accuracy of Information.....10 points

1. Enrollment requirements for 4-H'ers: Photography
2. The judge may offer conference judging. Date and time will be posted at check-in if available.
3. You may enter up to 2 photos/class, but no more than 5 photos total.
4. Single Photo Entry—Mounting and Photo placement:
 - a. Use only 11x12.5 white or tan studio mount/mat (cardboard, foam, or poster board not permitted). Studio mat board may be purchased from the County Extension Office.
 - b. Photos are to be mounted across the narrow (11") dimension of the 11x12.5" mat board, EXACTLY 1" from the top. The sides of the photo are to be equidistant from the sides of the mat. Improperly mounted photos will receive one ribbon reduction. Instructions for mounting are available in the Extension Office.
 - c. All photos must be no larger than 8x10" and no smaller than 7x9" after trimming. Remove all white borders before mounting.
 - d. A permanent mount (spray photo adhesive) must be used. Do not use white glue, contact cements, or tape. These will damage photo and not provide permanent bond in humidity.
 - e. No lettering is permitted on the photo or on front of the mounting mat. A special label is provided by the Extension office, which is taped to the bottom of the mount using masking tape. The complete directions are included with the special photo label, which are also used for the State Fair.
 - f. On the back of the mat, (lower left corner), print the 4-Her's county, where photo was taken, name, and address. Attach County Fair entry tag to the upper right corner of the back. Use masking tape to attach.
 - g. After judging has occurred all photos will be placed in a cellophane photo sleeve. The price for this sleeve is included in the cost of the photo mat when purchased at the Extension office. However, you will not receive the sleeve until your photo is judged. If you are concerned about damage to your photo while transporting it to check-in you may bring it in a 2-gallon zip lock bag.
 - h. Improperly mounted photos, oversize or undersize photo, photos with white borders not removed or lettering (including dates) on the photo, will be awarded a ribbon one placing lower than the placing determined by the official judge.
5. Sequence Series (Story Board) – Mounting and Placement
 - a. The photos must be 5x7" and mounted on a 16x20" white studio mount. (Cardboard, foam or poster board is not permitted.)
 - b. Three or four photos arranged on one studio mount with a minimum of ¼" between photos. Use vertical mount 16" across top.
 - c. The photos should tell a story.
6. Note: A 4-H exhibitor nine years old or older before January 1 of the current year receiving a purple award may enter one single photo and/or one video for State Fair competition. If a 4-Her has more than 8 years' experience, they are allowed 2 photo entries in the State Fair, provided the photos are in separate classes.

There are no State Fair classes for a 4-H exhibitor younger than nine years (before January 1 of the current year). Advance registration for the State Fair is required and will be available in the Fair Office during the fair. Guidelines for Judging 4-H Exhibit Photos: https://www.kansas4-h.org/events-activities/fairs/kansas-state-fair/docs/photography/Guidelines_for_Judging_4H_Photo_Exhibits.pdf.

SPACE TECH

Space Tech – Greg May, Chair mayfamilyfive@aol.com (913) 481-4907
Space Tech – Astronomy, Heather Anderson, Chair handerson3@gmail.com
(913) 957-6036

1. Enrollment requirements for 4-H'ers: Must be enrolled in Space Tech by May 1 of the current 4-H year.
2. Conference judging available. Sign up when checking in.
3. Rocketry
 - a) The report that accompanies the rocket must be limited to the 4-H Space Tech Rocket Exhibit Information Form which is affixed to a 10" x 13" envelope. This envelope should NOT be attached to the rocket stand or rocket. This may be downloaded from <http://www.johnson.k-state.edu/4-h/events-programs/johnson-county-fair.html>. Any rocket exhibit not including this completed envelope will receive an automatic participation ribbon.
 - b) Plans (or a photocopy) must be placed inside the envelope.
 - a. This includes original design rockets.
 - b. If a rocket kit has been modified structurally, notations need to be given indicating the changes made, either by notations on the Rocket Exhibit Information Form or by placing notes in the plans.
 - c) One or more photographs of the rocket at the launch site are required.
 - a. Photographs showing the rocket at the moment of ignition are preferred.
 - b. Photographs must be mounted on one side of 8 ½" x 11" page(s).
 - c. There must be at least 1 page of photos and no more than 5 pages of photos.
 - d. Include at least one photo showing rocket construction, preferably with the exhibitor included.
 - e. Do not include photos of members catching their rockets as they return to earth. This is an unsafe practice, and we do not recommend or condone this practice.
 - d) To exhibit in this division:

- a. The rocket must have been successfully flown. All rockets must have at least cleared the launch rod and the ejection charged fired while in flight prior to landing.
- b. Multi-stage rockets can be flown using just the final stage and considered fully flown.
- c. Support rods must not extend past the tip of the highest nosecone on the model.
- d. Support rods must remain in the upright position, 90 degrees to the display base, do not angle. If support rods are not perpendicular to the base, the judge should deduct two ribbon placings.
- e. No model may be submitted on a launch pad.
- e) Exhibit must be uniformly painted, smoothly finished, have decals applied smoothly and be properly assembled. If the rocket is a model of a "real" rocket, it must be painted according to accompanying plans. Other rockets should be painted according to accompanying plans, but variations are allowable if the reason for variation is described in the exhibit information.
- f) All entries must have been flown and recovered prior to being exhibited at the county fair. Information shall include date and location of launch, and information entered on the Information Form (available at the extension office). Launches should not be conducted in winds above 20 mph.
- g) Engines with an Engine size E or larger must have a NAR Membership Number. A copy of the NAR Certification with the NAR number must be included in the Information Package.
- h) All rockets must have a safe method of recovery, e.g., parachute, streamer or tumble recovery. Any rocket without a recovery system will be disqualified.
- i) Flight damage is to be documented by the participant on either the construction plans or the 4-H Space Tech Rocket Exhibit Information Form
- j) Engines and igniters, under any circumstance, ARE NOT permitted with the exhibit and constitute an immediate disqualification.
- k) If an engine becomes stuck, jammed, wedged, or in any other way permanently affixed in or to a rocket and cannot be removed from the rocket, the rocket will be subject to immediate disqualification. This is because it is not possible to make a full and immediate assessment of the safety of the rocket when it is being judged and safety is paramount.
- l) Rockets with factory made fin assemblies, plastic fins, and pre-finished rockets requiring no painting are **not** acceptable.
- m) Each exhibitor may have only one entry per class.
- n) Rockets are to be displayed on a wooden base, not to exceed ¾" x 8" square for small and medium sized rockets: wooden or metal support rods must not extend past the tip of the nose cone (no launch stands). Vertical Support rods are preferred.
- o) Angles of fins must fall within a plus or minus 2 degrees variation.
- p) For all Self-design classes:
 - i. Plans for rocket design must be included.

Exhibitors are encouraged to laminate all posters and maps or cover them with clear plastic film. Project notebooks must be organized in a 3-ring binder.
 - e) Team exhibits are defined as developed by two or more 4-H members.
 - f) Information for exhibitors with a GPS/GIS Map: One map constitutes an entry for individuals and two or more maps on a related project are required for a team project. Map can be either informational or directional, computer generated or hand drawn. A map is a single product of the data gathering, manipulation and presentation skills. Multiple related maps should be entered under GPS/GIS Community Mapping Projects. Value is placed on youth that can model the learning process, or show how their skills have increased while completing the map. Complete and attach a Map Project Description Sheet with entry. Community Mapping Projects consist of a detailed goal and multiple applications of either GPS or GIS skills. A conclusion is reached, a problem was evaluated or studied, a solution was found (or the problem was better defined). Value is placed on youth that can model the learning process, or show how their skills have increased while completing the project.

- posters, no additional exhibit information is required; no manila envelope is needed for these exhibits.
- iv. Two photographs showing telescope construction and operation are required. Photographs should be mounted on one side of an 8 ½" x 11" page. A brief caption should accompany each photograph. Place photos in the 10" x 13" manila envelope.
- v. The telescope must be properly assembled and painted with a smooth and uniform finish. Decals, if used, should be attached smooth and tight.

- e. Follow copyright laws, citing all sources of information in a standard notation. Sources of scientific information must be cited on the front of posters, notebooks, and display boards.
- f. Educational displays are not to exceed a standard commercial 3' x 4' tri-fold display board. No card board table exhibits will be allowed. Care should be taken to use durable materials that will withstand fair conditions. No electricity will be provided.

- i. Exhibitor's name county or district, age, and year(s) in project must be tagged or labeled in a prominent location on the notebook. For educational displays and/or posters the exhibitor's name, county, age and year(s) in project must be tagged or labeled on the back of the exhibit. Failure to label on exhibit may result in one ribbon placing deduction.
