

Montana

Montana is known for its scenic landscape. The wide-open spaces, wild rivers, majestic mountains and abundant wildlife make it unique. Did you know Montana is being invaded by plants that are not native to our state? We call these nonnative plants. Many come from Europe and Asia. Nonnative plants are often "invasive" or even worse "noxious." These plants can cause harm by crowding our native plants and taking over wildlife habitats. Noxious weeds can also be devastating to farmers and ranchers trying to bring food to our tables. Remember to do your part to stop the spread of noxious weeds.

Can you name the following symbols of Montana the Treasure State?

Montana state flower?

Montana state grass?

Montana state bird?

Montana state animal?

Montana state tree?

Can you name a noxious weed that is in Montana and shouldn't be?

When finished color in the Montana State Seal.
