	Number of Trouble Breakers			
	Number of Feeder Cables:			
	Feeder Wire Size:			
	Fair Breaker Size Requested:			
	Other:			

Prior to being accepted as a vendor for the New Mexico State Fair, each vendor must present the unit he will be using at the fairgrounds for inspection by the State of New Mexico Regulation and Licensing Department's State Electrical Inspector to assure that the unit meets or exceeds the State Electrical Code. A copy of the code is inserted below. For units that are constructed on the fairgrounds, the State Inspector shall certify that the booth is up to State Electrical Code standards. This certification does not exempt the vendor from maintaining his unit in an acceptable condition while vending at the State Fair. A vendor must have completed the inspection and the unit must pass inspection before a connection may be completed to the electrical service at the fairgrounds.

The New Mexico State Fair is not responsible for any damage that may be sustained by a vendors unit while connected to the fairgrounds electrical grid. The New Mexico State Fair has the right to refuse a vendors application based on their electrical survey and has the right to eject any vendor that does not maintain or correct discrepancies immediately. These requirements do not alter or amend the vendor's original Space Agreement.

I have read, understand and agree to the above conditions.

Vendor's Signature: _____ Date: _____

TITLE 14 HOUSING AND CONSTRUCTION
 CHAPTER 10 ELECTRICAL CODES
 PART 4 STATE OF NEW MEXICO ELECTRICAL CODE

G. Article 250 – Grounding

- (1) 250.32 (B) (2). Two or more buildings, grounded conductor. Delete in its entirety.
- (2) 250.50 Grounding Electrode Systems. Add, "On single family dwellings, guest house, studios or detached garages, a concrete encased electrode shall be considered available and installed in compliance with NEC 250.52 (A)(3). If a concrete encased electrode is not present, at least 20 feet of bare copper in direct contact with the earth at a depth below the earths surface of not less than thirty (30) inches shall be installed."
