

CITYSCAPES & SILHOUETTES

A STEP BY STEP CRAFT TUTORIAL

Cityscape Tutorial

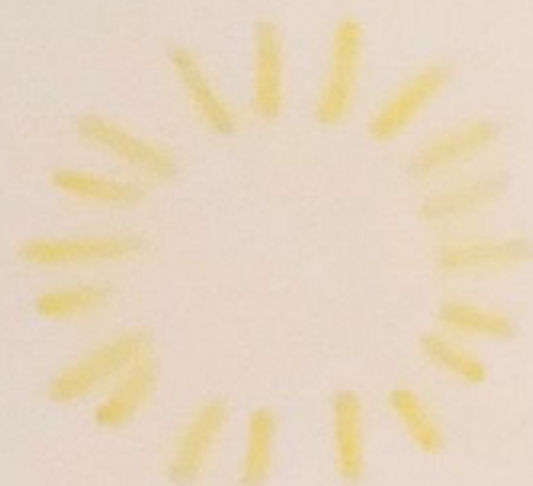

1

Materials:

- Glue
- Markers
- Scissors
- Pencil
- White & black construction paper

2

Draw individual lines with your marker & form a circle on the white paper. Leave a white space for the center of your 'sun'. Choose a color scheme that would work best with your design.

3

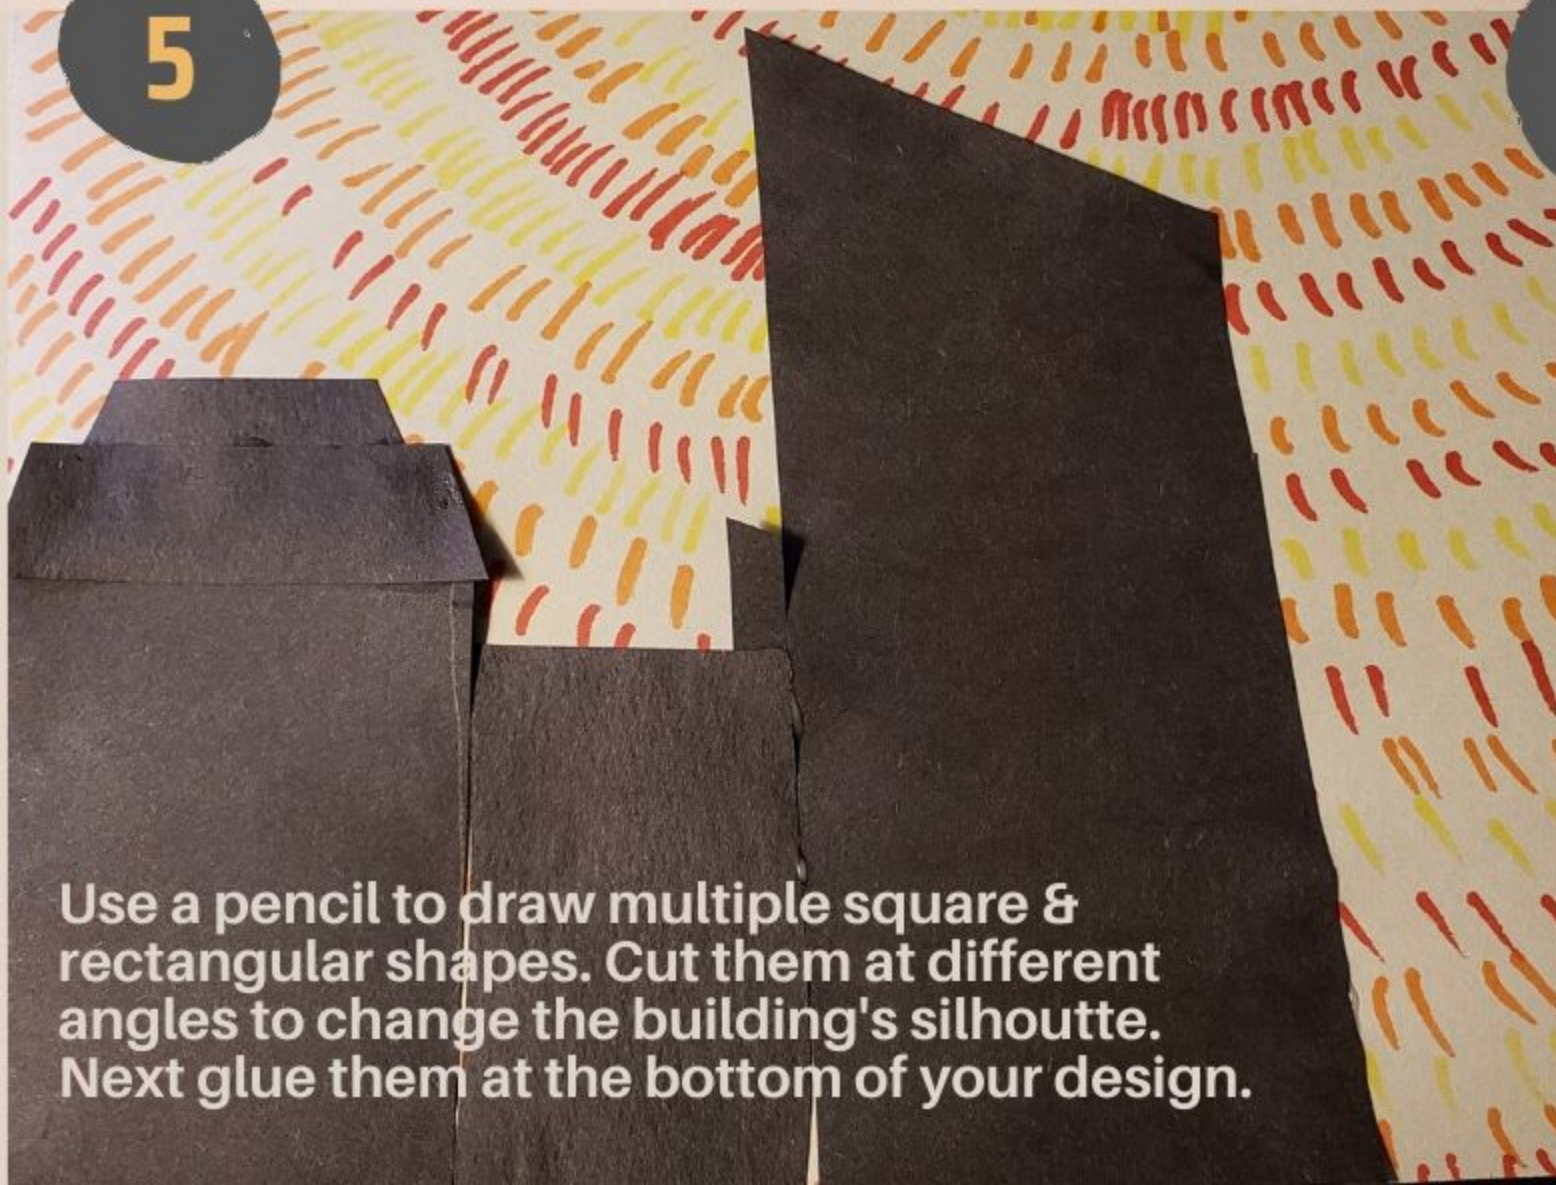

Continue to draw more lines in a circular manner. Add more color between the lines if there is too much space between them.

4

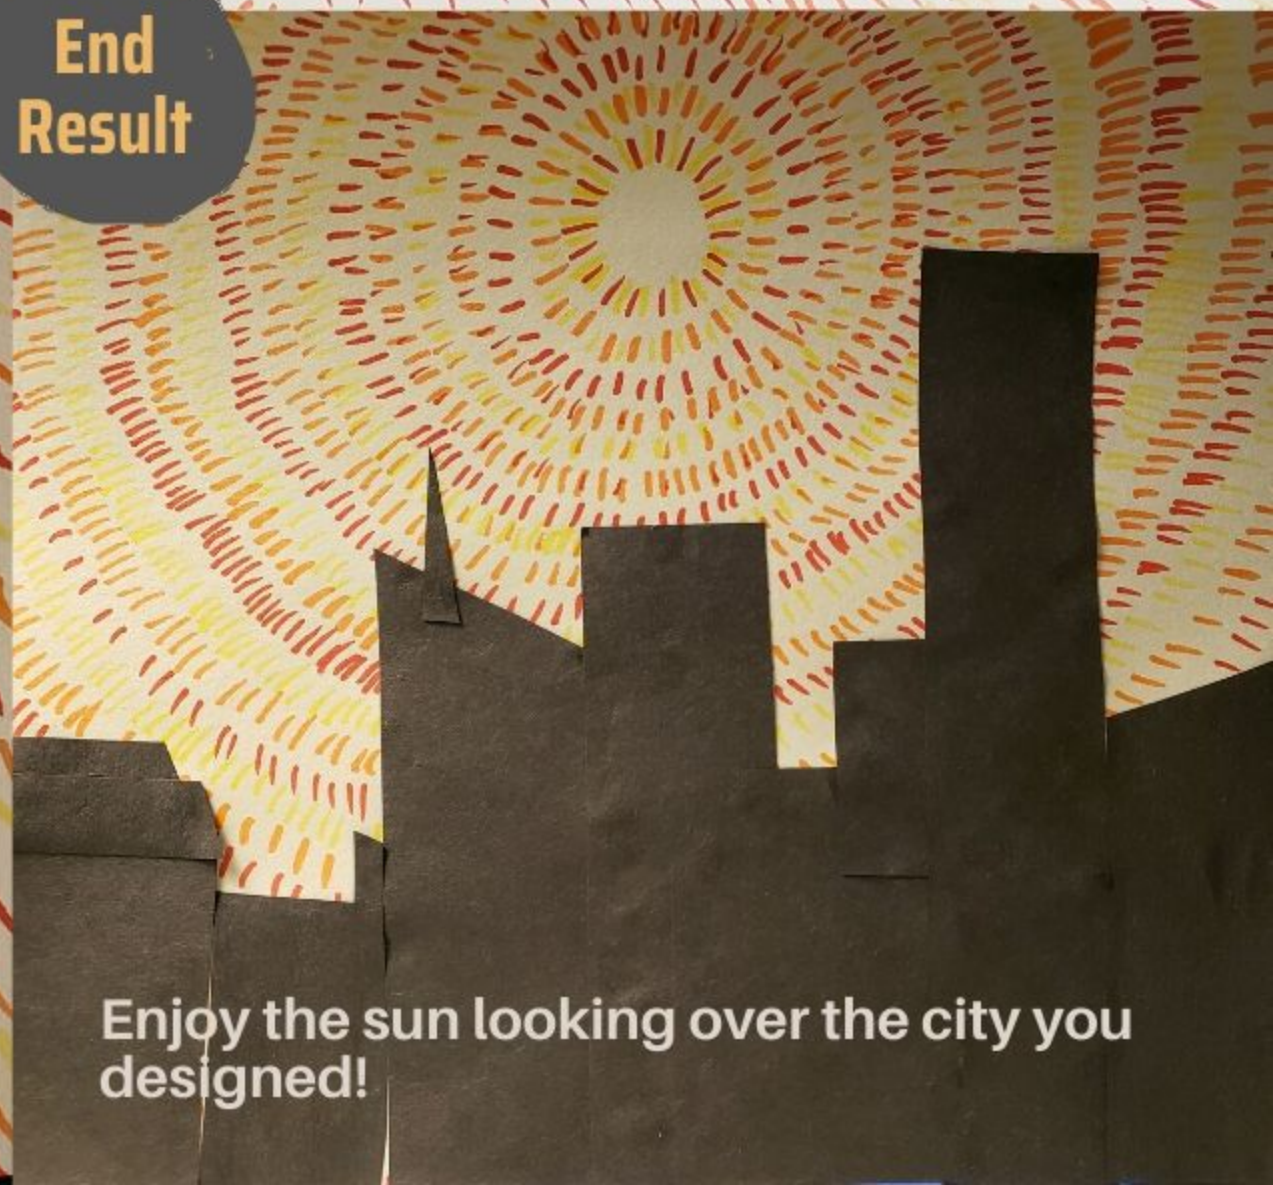

Cover the entire paper with radiating lines.

5

Use a pencil to draw multiple square & rectangular shapes. Cut them at different angles to change the building's silhouette. Next glue them at the bottom of your design.

End Result

Enjoy the sun looking over the city you designed!
